

DUST DEPOSITION GAUGE

Used for the monitoring of fugitive dust emissions from industrial sites. Placed throughout and around the perimeter of your site, the contents can be filtered and weighed regularly to determine the amount of dust in the immediate environment.

Applications for any industry where the control of fugitive dust is important for maintaining environmental standards. Can also be used as a secondary rain gauge.

Two buckets provided, allowing one to be processed while the other is in place.

Dimensions:

Total standing height: 1940mm
Bucket dimensions: H400mm x Diam200mm
Bird perch: Top Diam. 440mm, 8mm rod

Stand: 1400mm above ground, 2" pipe

Includes: Stand assembly
2 x collecting buckets
1 x shipping lid
